

# THE MARS HABITATION MISSION

[ SOMETIME INTO THE FUTURE... ]

The International Space Program has been exploring Mars for 50 years to date. They have built structures, explored the majority of the landscape, and have concluded that it is possible to live on Mars for extended periods of time.

Several species have been identified living on Mars. However, it is still undetermined if they can cohabitate or if they pose a potential threat to other life forms.

After several successful smaller habitation trials, the International Space Program has created the first ever, large group colonization project known as "Mars Habitation Mission".

You have been selected to travel to Mars, complete the mission, and then travel home.

Your 'package from earth' will include the sustenance and supplies required for the mission!

THE MISSION BEGINS NOW...

## MISSION ZODIAC

Create your own zodiac constellation with embroidery hoop art.

Find the instructions and all materials in your 'package from earth'.

## MISSION 'SAY CHEESE'

Take your picture to commemorate the mission! Visit other planets and leave messages to be viewed from earth by using the stickers, frames and backgrounds in this virtual photo booth. All photos will be used to create a photo mosaic as a legacy of your mission.

Find the link in your Virtual Mission Guide (sent via email and slack).

## THE GALLEY

The Galley is your place to chat and connect with your fellow comrades. Create your own space-themed cocktail and treat, and show off your costumes in the company of friends.

Find the link in your Virtual Mission Guide (sent via email and slack).

## MISSION MAD SCIENTIST

In 'The Galley' you'll find Chief Scientist, Dr. Erick Rosende, sent to Mars to explore and test the samples discovered by the Perseverance Rover. Left to his own volition, he's inevitably concocted up a few extra-tasty experiments.

Find the instructions and ingredients for your space-themed cocktail in your 'package from earth'.

Use the links in 'The Galley' to follow along with Dr. Rosende as he demonstrates how to concoct the perfect space cocktail, based on your selection.

### COCKTAIL DEMONSTRATIONS INCLUDE:

The Sirenium - Tequila

The Utopia - Gin

The Arcadia - Vodka

The Elysium - Whiskey

The Valles Marineris - Zero Proof

The Amazonis - Zero Proof

## MISSION INTERGALACTIC ENTERTAINMENT

Tune in to a live DJ and light show running throughout the whole evening! Use the chatbox to make requests and interact with Commander Joses Martin.

Find the link in your Virtual Mission Guide (sent via email and slack).

## MISSION INTERDIMENSIONAL TV

Enjoy a live improv performance and take part in choosing which 'interdimensional channel' you would like to watch from the mars-vision on your screen.

Find the link in your Virtual Mission Guide (sent via email and slack).

## MISSION ESCAPE

You and several of your fellow comrades have fallen through a wormhole! The wormhole leads you to a place called Ribston Pippin University, in the year of 1990. You will be trapped there by The Agency for International Reconnaissance (AIR), who needs your technological expertise and help to solve a crime before they will send you back to your current space and time.

Find the link through your calendar invite that corresponds with the start time you had selected, out of the following:

7:30PM

8:30PM

9:30PM

Please sign in to the 'Escape' Zoom Room 5 minutes in advance of your start time on your laptop or desktop computer (not suitable for mobile).
